* Deal only valid through your area's sales rep.

ASTER FLOW

FLUID COMPOSITE

High-viscosity microhybrid resin, with a 72% filler load, for minimally invasive restorations. Reduces microfractures caused by chewing stress.

- Excellent fluidity.
- High mechanical resistance to mastication.
- Low shrinkage during polymerization.

Aster Flow is indicated for:

- Pit and fissure sealing.
- Minimally invasive restorations.
- Base for direct restorations.
- Tunnel preparation.
- Enamel defect repair.
- Restoration in deciduous tooth (baby or temporary tooth).
- Classes III and V.

AVAILABLE COLORS:
A1, A2, A3 and B0,5 (2 g Syringe)

72% OF CHARGE

Source: Dr. Joaquín Prario

ASTER

NANOHYBRID COMPOSITE

Photocurable microhybrid resin with nanohybrid particles for direct and indirect restorations of anterior and posterior teeth. Average particle size 0.5 μm.

- Innovative silanization process for increased consistency and better handling.
- 4 levels of translucency.
- Opalescence y fluorescence.
- Excellent mechanical properties.
- Even greater polishing and shining.

Aster is specially indicated for the rear and front sectors (class I, II, III, IV y V).

COLOR FIDELITY

The enamel and dentin colors faithfully follow the VITAPAN Classical scale.

AVAILABLE COLORS:

Dentin DA1, DA2 and DA3 (4 g Syringe)
Enamel EA1, EA2 and EA3 (4 g Syringe)
B0,5 (2 g Syringe)

Source: Dra. Ana Gabriela Alvarado Ramirez

FLIP-TOP LID

Easy-to-handle lid, can be opened and closed with one hand, and with a tight seal that ensures the preservation of the resin.

ERGONOMICAL

The syringe's body design is anatomical to fit perfectly in the palm of the hand.

K-BOND+ UNIVERSAL

SMART-LOCK CLOSURE

Double smart closure for greater security and less evaporation.

PHOTOPOLYMERIZABLE ADHESIVE

Photocurable universal adhesive system for enamel and dentin with strong adhesive properties for longer-lasting results. **No color alterations**, does not interfere with the aesthetics of the restoration and final cementation.

- Enhanced MDP: double adhesive power.
- Several etching protocols: self-etching, selective etching, and total etching.
- Reduces post-operative sensitivity.
- BPA Free.
- Doesn't interfere in the final result.
- First + bond in the same bottle.
- Ethanol-based.

Bisphenol Free

K-BLEACH 35%

15 MINUTE
SESSIONS WITH
COLOR CHANGE

CLINIC TEETH-WHITENING KIT

Teeth-whitening kit made with 35% Hydrogen Peroxide for vital and non-vital teeth in the clinic.

- With heat inhibitor
- Contains potassium nitrate and sodium fluoride to reduce the hypersensitivity.
- Prevents wastage: presented in two bottles, peroxide and thickener, to mix the required amount for each application.

EACH KIT CONTAINS:

- 1 hydrogen peroxide bottle.
- 1 thickener bottle.
- 1 peroxide neutralizing solution (Neutralize).
- 1 spatula.
- 1 gel preparation plate.
- 1 K-Dam Syringe.

For the purchase of 3 K-Dam, 1 Aster Flow free of charge*

* Deal only valid through your area's sales rep.

AVAILABLE COLORS:
BLUE (2 g syringe)

K-DAM

GINGIVAL BARRIER

Photocurable resin for total or partial gingival isolation.

- Excellent thixotropy, it does not drip.
- Direct Application
- Easy to remove

K-DAM is indicated for:

- Total isolation for in-clinic teeth whitening.
- Partial isolation: isolating individual teeth using a dental dam.

K-BLEACH RM

MICROABRASIVE STAIN REMOVER

REVITALIZE YOUR SMILE

6% hydrochloric acid and silicon carbide-based microabrasion for removing stains caused by fluorosis, superficial enamel hypoplasia, structural defects that cause discoloration, and inactive caries white spots.

KIRA

SMART POLYMERIZATION LAMP

Kiyomi's Kira polymerization lamp, known for its advanced **ergonomics** and remarkable **durability**, offers comfortable and highly efficient handling. Its metal head, with an ideal **diameter of 10 mm**, is excellently designed for performing photopolymerization in any area of the mouth, whether in front teeth or molars. Kira's **precision and effectiveness** are essential to ensure dental treatments of the highest quality.

ERGONOMIC DESIGN

VERY LIGHT

AUTOSTOP

AMBIDEXTROUS

LONG LASTING BATTERY

KIRA IS FLAT, MAKING IT THE PERFECT TOOL FOR WORKING ON MOLARS

MULTIPLE CURING OPTIONS

Kira offers six modes as to adapt to diverse clinical situations:

MO

M1

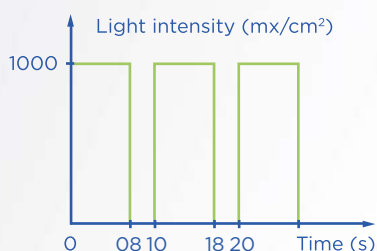

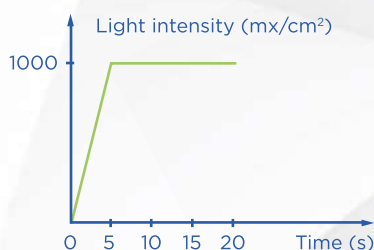

M2

MO, M1 AND M2 MODES

Light intensity adjustment between 1.000 mW/cm², 1.500 mW/m² or 2.300 mW/cm², with a wavelength from 385 Nm to 515 Nm, covering a wide spectrum.

RAMP MODE

It gradually increases the light intensity from 0 to 1,000 mW/cm² during the first 5 seconds and then remains constant, emitting a sound every 5 seconds.

PULSE MODE

It emits a light intensity of 1,000 mW/cm² that flashes once per second and emits a sound every 5 seconds.

DETECTION MODE

Its light intensity is 600 mW/cm² with a wavelength between 385nm and 410nm. When the activation button is pressed, the light activates immediately and emits a sound every 5 seconds.

A HIGHLY EFFECTIVE PREVENTIVE SYMBIOSIS OF HYDROXYAPATITE AND FLUORIDE.

APACARE® REMINERALIZES AND REPAIRS ENAMEL DEFECTS

Liquid enamel, also known as medical hydroxyapatite, containing ApaCare®, stimulates tooth remineralization, reduces sensitivity and hypersensitivity, and acts as a natural whitening agent.

APACARE® TOOTHPASTE SMOOTHS, SEALS AND WHITENS THE TEETH

The ApaCare® toothpaste contains sodium fluoride (1,450 ppm of fluoride ion) and liquid enamel that adheres to the tooth surface during brushing.

SUITABLE FOR CHILDREN AND ADULTS.

SPECIALLY SUITABLE IN CASES OF HIGH CAVITY TENDENCY, SENSITIVE TEETH OR AFTER EATING ACIDIC FOODS.

~~11'00 €~~

APACARE® LIQUID SMOOTHER AND SHINIER TEETH

Antibacterial mouthwash with medical hydroxyapatite for the prevention of cavities and periodontitis.

REDUCES INCIPIENT CAVITIES AND PERIODONTAL BACTERIA.

CONTAINS ESSENTIAL OILS THAT FIGHT THE BIOFILMS AND PATHOGENIC BACTERIA

CONSIDERABLY
REDUCES
SENSITIVITY

HIGHLY
RICH IN
HIDROXIAPATITA.

CONTAINS NO ABRASIVE
SUBSTANCES (RDA<10).

APACARE® REPAIR INTENSIVE REPARATION

Repairing, desensitizing and whitening gel.

ApaCare Repair is highly enriched with medical hydroxyapatite.

The liquid dental enamel (medical hydroxyapatite) protects the teeth with a very thin protective layer. Teeth are whitened and coated with a shiny layer that repels bacteria and plaque. It significantly reduces sensitivity, repairs incipient cavities, pores, and roughness, and helps to slow the progression of white spots. ApaCare Repair does not contain abrasive substances (RDA <10).

*Home-use with medical
prescription. **
