AND VERSATILITY
AT YOUR REACH

ASTER FLOW

COMPOSITE RESIN

Microhybrid resin with excellent viscosity, with a 72% filler load, for minimally invasive restorations. Reduces microfractures generated by stress during chewing.

- ▶ Excellent fluidity.
- ▶ High mechanical resistance to chewing.
- ▶ Low polymerization shrinkage.

Aster Flow is indicated for:

- ▶ Sealing pits and fissures.
- ▶ Less invasive restorations.
- ▶ Base for direct restorations.
- ▶ Prepared in tunnel.
- ▶ Repair of enamel defects.
- ▶ Restoration in deciduous tooth (baby or temporary tooth).
- ▶ Classes III and V.

ASTER

NANOHYBRID COMPOSITE RESIN

Microhybrid photocurable resin with nanohybrid particles for direct and indirect restorations of anterior and posterior teeth. Average particle size 0.5 µm.

- ▶ Innovative silanization process for greater consistency and better handling.
- ▶ 4 levels of translucency.
- ▶ Opalescence and fluorescence.
- ▶ Excellent mechanical properties.
- ▶ Polishing and even greater shine.

Aster is especially indicated for the anterior and posterior sector (class I, II, III, IV and V).

By purchasing 3 SYRINGES, receive 1 MORE free of charge (the lowest amount)

COLOR FIDELITY

The enamel and dentin shades follow the VITAPAN Classical scale faithfully.

FLIP-TOP LID

Easy-to-use lid, it can be opened and closed with one hand, and with an airtight seal that guarantees the conservation of the resin.

ERGONOMIC

The syringe body design is anatomical so that it fits perfectly in the palm of your hand.

WITH EASY EXCESS
REMOVAL SYSTEM.

DUAL CEM

AVAILABLE
COLOURS:

A1, A2, A3 and TRANS
(5 g automix syringe)

DUAL-CURING RESIN CEMENT

Dual-curing definitive cement for the cementation of crowns, bridges, fiberglass posts and inlays. Specially designed for **cementation of lithium, metal and zirconium disilicate.**

- Two types of curing: chemical + photocuring.
- Very resistant adhesion.
- Handleable: contains rheological properties for easy handling.
- No bubbles: the pasta mixture does not generate bubbles.
- High mechanical properties.
- Highly radiopaque.

Dual Cem is indicated for:

- Cementation of crowns, bridges and inlays.
- Inlays and onlays.
- Laminated crowns and veneers porcelain or composite resin.
- Fiberglass, ceramic or metallic poles.
- Maryland Bridges.

AUTOMIX SYRINGE

Ensures base mix and catalyst in a 1:1 proportion to increase its adhesive power.

K-BOND+ UNIVERSAL

SMART-LOCK CLOSURE

Smart double closure for more security and less evaporation.

LIGHT-POLYMERIZABLE ADHESIVE

Universal **light-curing adhesive system** for enamel and dentin with great adhesion power for longer lasting results.

Without color alterations, it does not interfere with the aesthetics of the restoration and final cementation.

- Potentialized MDP: double adhesive power.
- Various engraving protocols: self-etching, engraving selective and total engraving.
- Reduces postoperative sensitivity.
- BPA free.
- It does not interfere with the final result.
- Primer + bond in the same bottle.
- Ethanol base.

Bisphenol free

WHITER TEETH WITH GREAT RESULTS

HEAT INHIBITOR,
DOES NOT DEHYDRATE.

K-BLEACH 35%

SESSIONS OF
15 MINUTES WITH
COLOR CHANGE

CLINICAL WHITENING

Tooth whitening based on **Hydrogen Peroxide 35%** for vital and non-vital teeth in clinic.

- With heat blocker.
- Contains potassium nitrate and sodium fluoride to reduce hypersensitivity.
- Avoid waste: presentation in two bottles, peroxide and thickener, to mix the necessary amount in each application.

3+1

EACH KIT CONTAINS:

- 1 bottle of hydrogen peroxide.
- 1 bottle of thickener.
- 1 bottle of neutralizing solution of peroxide (Neutralize).
- 1 spatula.
- 1 plate for gel preparation.
- 1 syringe of K-Dam.

K-DAM

GINGIVAL BARRIER

Photocurable resin for total or partial isolation of the gum.

- Excellent thixotropy, does not drain.
- Direct application.
- Easy to remove.

K-DAM is indicated for:

- Total isolation for in-clinic teeth whitening.
- Partial isolation: dam of isolated pieces.

K-BLEACH RM

STAIN REMOVER BY MICROABRASION

REVITALIZE YOUR SMILE

Microabrasive based on 6% hydrochloric acid and silicon carbide to remove stains due to fluorosis, superficial enamel hypoplasia, structural defects that pigment and white spots of inactive cavities.

KIRA

INTELLIGENT POLYMERIZATION LAMP

Renowned for its **advanced ergonomics** and notable **durability**, Kiyomi's Kira curing light provides comfortable and highly efficient handling. Its metal head, with an **ideal diameter of 10 mm** is excellently designed to perform photopolymerization in any area of the mouth, whether on front teeth or molars. Kira's **precision and effectiveness** are essential to ensure the highest quality of dental treatments.

TO WORK ON MOLARS.

MULTIPLE CURING OPTIONS

Kira offers six modes of use to adapt to various clinical situations:

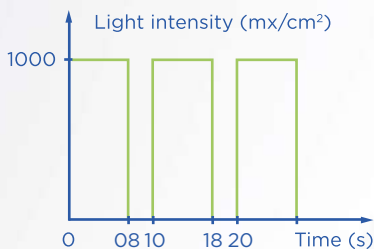

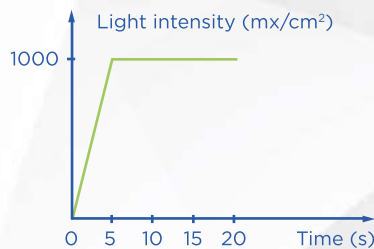

MODES M0, M1 Y M2

Light intensity adjustment between 1,000 mW/cm², 1,500 mW/cm² or 2,300 mW/cm², with a wavelength of 385 Nm to 515 Nm, covering a wide spectrum.

RAMP MODE

It **gradually increases the light intensity** from 0 to 1,000mW/cm² during the first 5 seconds and then remains constant by emitting a sound every 5 seconds.

PULSE MODE

It emits a **light intensity** of 1,000mW/cm² that flashes **once per second** and emits a **sound every 5 seconds**.

DETECTION MODE

Its light intensity is 600mW/cm² with a **wavelength between 385nm and 410nm**. When you press the activation button, the light activates immediately and emits a sound every 5 seconds.

A HIGHLY EFFECTIVE PREVENTIVE SYMBIOSIS OF HYDROXYAPATITE AND FLUORIDE

APACARE® REMINERALIZES AND REPAIRS ENAMEL DEFECTS

Liquid enamel, also known as medical hydroxyapatite, which ApaCare® contains, stimulates the remineralization of teeth, reduces sensitivity and hypersensitivity and acts as a natural whitening agent.

APACARE® REMINERALIZING PASTE

SMOOTHES, SEALS AND WHITENS TEETH

ApaCare® toothpaste contains sodium fluoride (1,450 ppm fluorine ion) and liquid enamel that adhere to the surface of the teeth during brushing.

SUITABLE FOR ADULTS AND CHILDREN.

PARTICULARLY SUITABLE IN CASE OF A HIGH TENDENCY TO CAVITIES, SENSITIVE TEETH OR AFTER ACIDIC FOODS.

~~11'00 €~~
75 ml tube.

6'63 €

Ref. 1001619

APACARE® LIQUID SOFTER AND BRIGHTER TEETH

REDUCES INCIPIENT CAVITIES AND PERIODONTAL BACTERIA.

CONTAINS ESSENTIAL OILS THAT FIGHT BIOFILMS AND PATHOGENIC BACTERIA.

~~18'00 €~~
200 ml bottle.

APACARE® VARNISH DESENSITIZING HOME INTENSIVE REPAIR

FULLY PROTECTIVE AND BIOCOMPATIBLE LAYER.

~~40'00 €~~
5 ml bottle.

22'46 €

Ref. 1040200

CONSIDERABLY
REDUCES SENSITIVITY.

HIGHLY ENRICHED
WITH HYDROXYAPATITE.

DOES NOT CONTAIN
ABRASIVE SUBSTANCES
(RDA<10).

APACARE® REPAIR INTENSIVE REPAIR

Repairing, desensitizing and whitening gel.

ApaCare Repair is highly enriched with medical hydroxyapatite.

Liquid tooth enamel (medical hydroxyapatite) protects teeth with a very thin protective layer. Teeth are whitened and coated with a shiny coating that repels bacteria and plaque. It considerably reduces sensitivity, repairs incipient cavities, pores and roughness, and helps stop the progression of white spots. ApaCare Repair does not contain abrasive substances (RDA <10).

*Home use under
medical prescription. **
