

K-BOND+ UNIVERSAL

DATASHEET

K-BOND+ UNIVERSAL

Simple and Easy

High bonding power for longer-lasting results

Next-generation light-curable universal adhesive for enamel and dentin that can be used under any **self-etch**, **selective etch**, or **total etch technique**.

Does not alter color, does not interfere with the aesthetics of final restoration and cementation.

- ✓ Its formular contains **Enhanced MDP** that increases adhesive power with dual bonding: micromechanical and chemical.
- ✓ **Contains silica nanoparticles** for greater stability and resistance of the adhesive film over time.

SMART-LOCK

Double smart closure for increased safety and reduced evaporation.

BPA Free

5 ml bottle

COLORLESS LOOK

Does not interfere with the look of restorations and cementations.

KIYOMI

K-BOND+ UNIVERSAL

Enhanced
MDP

- ✓ **Adhesive quality**
Contains solvents and balanced monomers for better affinity on the surfaces where dentin is wet and demineralized.
- ✓ High adhesion to different substrates: porcelain-metal, zirconia, feldspathic ceramic, lithium disilicate, composite resins, or hybrid materials.
- ✓ K-Bond+ Universal is suitable for all types of **direct composite restorations**, as well as **adhesive cementation** of prosthetic pieces such as crowns, inlays, onlays, overlays, endocrowns, or veneers.
- ✓ It can also be used for **adhesive repairs** of ceramic and composite with different bonding substrates.
- ✓ **Compatible with dual-cure, self-cure, and light-cure cements.**
- ✓ **Ethanol solvent**
- ✓ **Simplified steps:** first + bond in the same bottle.
