KIRA

KIYOMI

LIGHTEN UP EVERY DETAIL WITH PRECISION

The Kira curing light from Kiyomi is the perfect solution for your dental office. It features a **robust ergonomic design** and a 10 mm diameter metal head, **ideal for photopolymerization in any area**, whether on anterior or posterior teeth.

KIRA IS FLAT, MAKING IT THE
PERFECT TOOL
FOR WORKING ON MOLARS.

Its **ergonomic and compact design** allows access to any area of the mouth, ensuring that the light beam is as close as possible to the photoactivation area, **achieving greater depth of material polymerization.**

With the Kira polymerization light, it is possible to obtain **precise and perfect results** in all photopolymerization sessions, regardless of the challenging conditions in your dental office.

109g

TRULY LIGHTWEIGHT

Thanks to its **reduced weight**, it is easy to handle, allowing the dental professional to perform **prolonged treatments** without muscle fatigue.

MULTIPLE CURING OPTIONS

The Kira polymerization light has **six operating modes** available, allowing you to select the **appropriate curing option** for each situation.

M0

M1

M2

MODE M0, M1 AND M2

Light intensity adjustment

between 1,000 mW/cm², 1,500 mW/cm², or 2,300 mW/cm² with a wavelength range between 385 nm and 515 nm, offering a **broad wavelength spectrum.**

RAMP MODE

Gradually increases light intensity

from 0 to 1,000 mW/cm² during the first 5 seconds and then remains constant, emitting a sound every 5 seconds.

PULSE MODE

Emits a **light intensity** of 1,000 mW/cm², **flashing once per second** and emitting a sound every 5 seconds.

DETECTION MODE

Its light intensity is 600 mW/cm² with a wavelength range between 385 nm and 410 nm. When the activation button is pressed, the light is immediately activated and emits a sound every 5 seconds.

This mode is ideal for **observing fluorescent materials**, such as most restorative materials, as well as for **evaluating the depth of injuries, caries, hypomineralization, fissures, and calculus**. Additionally, it is useful for the **removal of post-orthodontic material and excess material** during cementation, avoiding inflammatory damage to the supporting tissues of the tooth.

SMART TECH& VERSATILITY AT YOUR FINGERTIPS

Kira features an **intelligent control chip** for uniform and precise polymerization.

The 360° lamp head emits light from **4 powerful LEDs** (3 blue and 1 ultraviolet) with wavelengths ranging from 385 to 515 nm, ensuring **wide coverage** for your patients.

Moreover, the light boasts **impressive polymerization depth and breadth** of up to 10 mm.

CONVENIENCE AND VERSATILITY IN ONE WIRELESS CURING LIGHT

Kira is an excellent choice for those seeking the convenience of a wireless device. The battery offers **long-lasting power** for your treatments.

AMBIDEXTROUS

EQUIP YOUR DENTAL OFFICE WITH OUR ALL-IN-ONE POLYMERIZATION LIGHT

The Kira light is **exactly what you need**. In addition to its excellent performance and ease of use, it comes with a range of included accessories for a **complete and convenient experience**.

SPECS

Size: 24x21x230 mm

Net weight: 109 g

Lens: 11 mm

Power source: >1200 times, 3 sec. maximum light

Product includes:

1 light source head

1 protective light screen

1 disposable sheath

1 handpiece

1 adapter

1 charging base

THE LIGHT THAT SHINES WITH
THE QUALITY OF YOUR WORK
