ASTER FLOW

FLUID COMPOSITE RESIN

Microhybrid resin with excellent viscosity, with a 72% filler load, for minimally invasive restorations. Reduces microfractures generated by stress during chewing.

- Excellent fluidity.
- High mechanical resistance to chewing..
- Low polymerization shrinkage.

Aster Flow is indicated for:

- Sealing pits and fissures..
- Less invasive restorations.
- Base for direct restorations.
- Prepared in tunnel.
- Repair of enamel defects.
- Restoration in deciduous tooth (baby or temporary tooth).
- Classes III and V.

AVAILABLE COLOURS:
A1, A2, A3 AND B0,5 (2 g syringe)

72%
OF LOAD

ASTER

NANOHYBRID COMPOSITE RESIN

Microhybrid photocurable resin with nanohybrid particles for direct and indirect restorations of anterior and posterior teeth. Average particle size of 0,5 µm.

- ▶ Innovative silanization process for greater consistency and better handling.
- ▶ 4 levels of translucency.
- ▶ Opalescence and fluorescence.
- ▶ Excellent mechanical properties.
- ▶ Polishing and even greater shine.

Aster is especially indicated for the anterior and posterior sector (class I, II, III, IV and V).

Dual-cure permanent cement for the luting of crowns, bridges, fiberglass posts, and inlays. Specifically designed for the **cementation of lithium disilicate, metal, zirconia, fiberglass, composite, and hybrid materials.**

- Two types of curing: auto & photo.
- High resistance and sealing safety.
- Handleable: contains rheological properties for easy handling.
- High mechanical properties.
- Highly radiopaque.

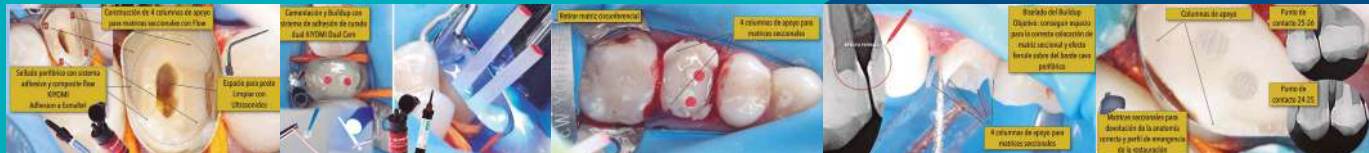

Dual Cem is indicated for:

- Crowns, bridges, posts and inlays.

K-BOND+ UNIVERSAL

SMART-LOCK

Smart double closure for more security and less evaporation.

LIGHT-CURING ADHESIVE

Universal **light-curing adhesive system** for enamel and dentin with great adhesion power for longer lasting results.

Without color alterations, it does not interfere with the aesthetics of the restoration and final cementation.

- Potentialized MDP: double adhesive power.
- Various engraving protocols: self-etching, engraving selective and total engraving.
- Reduces postoperative sensitivity.
- BPA-free.
- It does not interfere with the final result.
- Primer + bond in the same bottle.
- Ethanol-based solvent.

Free of bisphenol

5 ml bottle

COLORLESS APPEARANCE

It does not interfere with the aesthetics of restorations and cementations.

WHITER TEETH WITH GREATER RESULTS

HEAT BLOCKER,
NO DEHYDRATION.

K-BLEACH 35% CLINIC

15 MINUTE SESSIONS
WITH COLOR CHANGE

CLINIC TEETH WHITENING

Tooth whitening based on **35% Hydrogen Peroxide** for vital and non-vital teeth in clinic.

- Comes with a heat blocker.
- Contains potassium nitrate and sodium fluoride to reduce hypersensitivity.
- Avoids waste: presentation in two bottles, peroxide and thickener, to mix the necessary amount in each application.

3+1

EACH KIT CONTAINS::

- 1 bottle of hydrogen peroxide.
- 1 bottle of thickener.
- 1 bottle of neutralizing solution of peroxide (Neutralize).
- 1 spatula.
- 1 plate for gen preparation.
 - 1 K-Dam syringe.

KIRA IS FLAT, TURNING HER
INTO THE **PERFECT TOOL**
TO WORK ON MOLARS.

MULTIPLE CURING OPTIONS

Kira offers six modes of operation to adapt to various clinical situations:

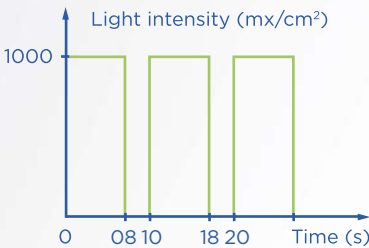

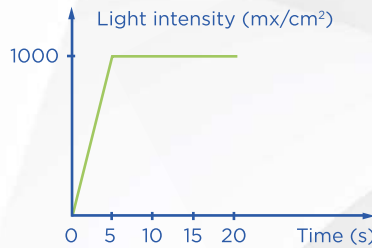

MODES M0, M1 & M2

Light intensity adjustment between 1,000 mW/cm², 1,500 mW/cm² or 2,300 mW/cm², with a wavelength of 385 Nm to 515 Nm, covering a wide spectrum.

RAMP MODE

It **gradually increases the light intensity** from 0 to 1,000mW/cm² during the first 5 seconds and then remains constant by emitting a sound every 5 seconds.

PULSE MODE

It emits a **light intensity** of 1,000mW/cm² that **flashes once per second** and **emits a sound every 5 seconds**.

DETECTION MODE

Its light intensity is 600mW/cm² with a **wavelength between 385nm and 410nm**. When you press the activation button, the light activates immediately and emits a sound every 5 seconds.

HIGHLY EFFECTIVE PREVENTIVE SYMBIOSIS OF HYDROXYAPATITE AND FLUORIDE

APACARE® REMINERALIZES AND REPAIRS ENAMEL DEFECTS

Liquid enamel, also known as medical hydroxyapatite, which ApaCare® contains, stimulates the remineralization of teeth, reduces sensitivity and hypersensitivity and acts as a natural whitening agent.

APACARE® REMINERALIZING PASTE

SMOOTHES, SEALS AND WHITENS TEETH

ApaCare® toothpaste contains sodium fluoride (1,450 ppm fluorine ion) and liquid enamel that adhere to the surface of the teeth during brushing.

SUITABLE FOR ADULTS AND CHILDREN.

CONTAINS ESSENTIAL OILS THAT FIGHT BIOFILMS AND PATHOGENIC BACTERIA..

~~7'85 €~~
75 ml tube.

7'07 €

APACARE® VARNISH DESENSITIZING HOME INTENSIVE REPAIR

FULLY PROTECTIVE AND BIOCOMPATIBLE LAYER.

- Contains 20% hydroxyapatite.
- Application brush integrated into the cap for easy use.

~~26'30 €~~

5 ml bottle.

23'67 €

Ref. 1040200

CONSIDERABLY REDUCES SENSITIVITY.

HIGHLY ENRICHED WITH 10% HYDROXYAPATITE.

DOES NOT CONTAIN ABRASIVE SUBSTANCES (RDA<10).

APACARE® REPAIR INTENSIVE REPAIR

Repairing, desensitizing and whitening gel.

ApaCare Repair is highly enriched with medical hydroxyapatite (10%).

The liquid dental enamel (medical hydroxyapatite) protects teeth with an ultra-thin protective layer. It whitens teeth and coats them with a shiny layer that repels bacteria and plaque. It significantly reduces sensitivity, repairs early-stage cavities, pores, and roughness, and helps slow the progression of white spots.

ApaCare Repair contains no abrasive substances (RDA <10).

*Home use under medical prescription. **
